

> Practice breaking it down! Choose one of the following to explain as if the listener has never done it before: What are the steps involved in making a cup of coffee?

1. Choose a k-cup pod which says 'coffee'
2. Place the pod into the Keurig coffee machine
3. Close the lid
4. Choose a mug
5. Place the mug into the machine
6. Pour enough water to make a cup of coffee
7. Plug in the Keurig coffee machine
8. Press the power button
9. Press the size of the coffee
10. Wait until the machine fills up the coffee into the mug
11. Enjoy the coffee

> In our “Say Hi” example, if the Say Hi part of the program never runs, how would you narrow down the cause of the problem? Explain the process and use a roadmap to visualize it.

Because the user was putting a space in front of the name, the program never runs.

Road Map for Saying Hi

> Create a problem-solving example using a roadmap and the process of elimination for narrowing down issues of your own.

My problem is that I cannot wake up at the designated time. Usually, I finish looking at computer monitor by 11 pm, start reading a book at 11:30 pm, sleep at midnight and wake up at 8 pm.

By breaking down the steps when I cannot wake up in the morning, the cause of the issue is that I look at computer monitor until right before going to bed and lose time to read a book.

Road Map for Waking Up in the Morning
